

Thank you Madam President,

Palestine would like to welcome the Delegation of Ecuador to the UPR working group and the presentation of their national report. In this matter my delegation welcomes the efforts made by the Ecuadorian government since 2006 to implement and improve the human rights situation in the country.

We have noticed the positive steps taken to reduce poverty rate through introducing new social and economic policies. We recommend the government of Ecuador to pursue its efforts reforming the educational system as it is an important element in minimizing poverty. Furthermore, we recommend accelerating the application of the rights related to good living including the food sovereignty, and healthy environment.

Regarding child labor my country would like to take this opportunity to praise the significant efforts made in this regard by the Government of Ecuador through introducing a national plan that aims to progressively eradicate child labor rate.

Finally, we convey Ecuador's efforts in implementing the recommendations of working group and urge it to further promote its efforts in this regard.

I thank you Madam

What are the procedures taken by the government in fighting poverty???????
