**Statement by Angola during the Review of Germany at the 16<sup>th</sup> Session of the  
Universal Periodic Review**

**(25<sup>th</sup> April 2013, Geneva)**

Angola welcomes the delegation of Germany to the UPR Working Group and thanks for the presentation made.

Angola appreciates the detailed information provided in national report on the implementation of the accepted recommendations and the developments on the normative and institutional framework for the promotion and protection of human rights. On this regard, Germany has adopted a number of new legislation in view to strengthen its national mechanism of promotion and protection of human rights.

Moreover, since its first review Germany has ratified or signed a number of regional and international instruments, including the International Convention for the Protection of all Persons against Enforced Disappearance.

While commending Germany policies and actions to promote migrants and minority

groups rights, Angola would like to recommend Germany to reinforce measures to combat xenophobia and other related crimes.

I thank you Mr. President.
