**Albanian Statement
on UPR-Singapore**

Mr. President,

Albania greets the delegation of Singapore for presenting their comprehensive national report today.

We would like to commend the progress made by Singapore's Government for its efforts for rebalancing the economic and social Strategies while mitigating inequality and giving their citizens greater assurance at each stage of their lives.

In addition, we congratulate also the measures undertaken on providing quality and affordable care for elderly persons putting in place programmes and relevant infrastructure in their benefits.

While encouraging the Singapore Government for further improvements with regard to Human Rights, Albania has the following recommendations:

1. To enact new legislation for providing early intervention and better protect vulnerable adults from abuse and harm due to neglect and self-neglect,
2. To consider the accession to the Optional Protocol to the Convention on the Rights of the Child on the Sale of Children, Child Prostitution and Child Pornography.

Albanian would once again wish Singapore's Government a successful review session.

Thank you!
