

25th Session of the UPR Working Group
Review of Thailand
Statement by Armenia

We welcome the delegation of Thailand and thank for the presentation of the national report.

Armenia notes with appreciation the steps taken to ensure access to health care services, as well as to reduce maternal and infant mortality rates. We also appreciate the efforts to promote human rights education in the country.

We note that there still remain a few major international human rights instruments to be ratified and we recommend:

- 1) To accede to the Convention on the Prevention and Punishment of the Crime of Genocide.
- 2) To further expand human rights education and training programs.
